

We supply all of our products from the well-known and trusted resources with the highest international standards and use trusted and valid inspection companies such as SGS, control union IGI, BSJ and etc in order to control and supervision to more ensure about the quality of our products.

Our group with several years experience in trading has required itself to supply the products with the best quality according to the customers' requirements.

For this purpose, besides the main inspection companies in the contracts, our group using experienced staff and expert inspection companies controls the products during purchasing and process of delivering.

- Sampling and testing during production and before delivering to the ports.
- Sampling and testing during discharge the trucks in the ports.
- Sampling and testing during loading the vessels or containers (By nominated inspection company in foreign contracts)
